- 2.00% Japan
- 1.50% Rest of World

*Due to the underlying investment instruments used within the portfolio the % allocations may differ slightly to those stated in the above charts.

## INVESTMENT OBJECTIVE

The aim of the model is to increase in value, over a minimum of 5 years, by investing in a range of asset classes and global markets. This will be achieved through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments such as dividends from shares and interest from bonds.

## INVESTMENT POLICY

The model will be actively managed, on a high risk strategy. It will aim to maintain an internal risk rating classification of 8. The risk rating range is from 1 (lowest risk) to 10 (highest risk). This range is utilised across the whole of our investment proposition. The model will invest in a number of different asset classes across global markets, including shares in companies, bonds, property and commodities.

## ABOUT KING FINANCIAL PLANNING

James King has been successfully advising clients for over 25 years. King Financial Planning's aim is simple: to provide independent and professional advice at a fair cost. King Model Portfolios are appropriate for a wide range of investors, including private clients, pensions, trusts, companies and charities.

## KING MODEL PORTFOLIOS

The King Model Portfolios consist of index-tracking investments, providing low-cost exposure to a comprehensive range of assets and markets. The portfolios target specific levels of volatility and are matched to a client's attitude to risk. This approach aims to reduce costs and outperform the model portfolio benchmark. Clients will benefit from a competitive, transparent charging structure, on-going active portfolio management and online access to their portfolios 24 hours a day.

## INVESTMENT PHILOSOPHY

The fund management industry has experienced significant change in the last quarter of a century. Product innovation has enabled investors to benefit from wider exposure to global financial markets with far greater efficiency and at a lower cost. Index-tracking investments such as Exchange Traded Funds (ETF) have grown increasingly important. We believe an actively managed, globally allocated, multi-asset portfolio, comprised of low-cost ETFs with diversified holdings in equity, bond, commodity and property markets is statistically more likely to outperform a traditional "stock picking" manager most of the time.

## INVESTMENT STRATEGY

The King Model Portfolios are medium to long term investments (5 years or more) and are not suitable for money which might be needed in the short term.

## INVESTMENT TEAM

The Tavistock Asset Management Investment Committee carries direct responsibility for all discretionary investments at the firm. The principal focus of the committee is to monitor the performance of each investment solution within the Centralised Investment Proposition (CIP) against its stated investment objectives, target market and long-term return objective versus its peer group.

## ABOUT TAVISTOCK ASSET MANAGEMENT

Tavistock Asset Management (TAM) is authorised and regulated by the Financial Conduct Authority to provide Discretionary Fund Management (FRN: 955719). Tavistock Asset Management Limited is a wholly owned subsidiary of Tavistock Investments Plc. TAM manage over £1bn of assets on behalf of all clients, aiming to provide private clients with access to institutional quality portfolio management at a retail price. TAM's model portfolios provide individual investors with the benefit of collective buying power to ensure that the charges they incur for model portfolio management, platform fees and dealing are amongst the lowest in the industry. Currently, Tavistock has over 175 financial advisers helping 50,000+ private clients look after more than £3.5bn of investments.

## PEER GROUP

Although the PROFILE is not benchmarked against the IA sector one may wish to compare the performance of King Model Portfolio 8 to the IA Flexible Investment sector for peer group analysis.

May 2023

## MANAGER COMMENTARY

Technology stocks continued to shine as the S&P 500 Technology Index surged 9.46% this month, primarily due to media attention on artificial intelligence and semiconductors. One of the key players in this sector was Nvidia, which recently hit a $1 trillion market cap following a 36.34% increase in share price in May, taking year-to-date gains towards 160%. The S&P 500 rose marginally, rising 0.43% over the month whilst the MSCI World fell -0.93%, driven lower by the UK and Europe, down -5.04% and -2.36%, respectively. The MSCI emerging market equity index fell -1.66%. The United States debt-ceiling negotiations added volatility to the front end of the US treasury curve. This was reflected in interest rate futures, which fluctuated significantly throughout the month, at one stage pricing in a 70% probability of a June quarter-point rate hike, before falling back to end the month at 36%, reflecting House, and ultimately Congressional approval, averting a US default. Meanwhile, the UK 10-year yield continued its charge, rising by 47bps to 4.18% (yields move inversely to prices). Developed market government bonds ended the month down -2.19%, underperforming global investment grade and high-yield corporate debt, which declined -1.86% and -1.15%, respectively. The Bloomberg Commodity Index fell -6.08%, driven lower by the energy and industrial metals subsectors. After surpassing a key resistance level of $2,000 in April, Gold declined -4.27%, settling at $1,962 an ounce whilst Silver fell -9.85% from its intra-month high. In currency markets, the UK pound fell slightly versus the US dollar to 1.24, tempering a strong performance so far this year that saw the currency pair peak just above 1.26 earlier in the month.
