- 17.50% Asia ex Japan
- 1.00% Japan
- 3.00% Rest of World

INVESTMENT OBJECTIVE

The aim of the King Income model is to provide income, that is money paid out from investments such as dividends from shares and interest from bonds, with the potential for some increase, over a minimum of 5 years, in the value of an investment. The King Income Portfolio will also aim to provide an average annual income in excess of inflation (as determined by the UK Consumer Price Index) by 1%, over any 5-year period on a rolling basis. However, there is no guarantee this will be achieved.

INVESTMENT POLICY

The King income model will be actively managed, on a low medium risk strategy. It will aim to maintain an internal risk rating classification of 5. The risk rating range is from 1 (lowest risk) to 10 (highest risk). This range is utilised across the whole of our investment proposition. The model will invest in a number of different asset classes across global markets, including shares in companies, bonds, property and commodities.

For Use By Professional Intermediaries Only.

ABOUT KING FINANCIAL PLANNING

James King has been successfully advising clients for over 25 years. King Financial Planning's aim is simple: to provide independent and professional advice at a fair cost. King Model Portfolios are appropriate for a wide range of investors, including private clients, pensions, trusts, companies and charities.

KING MODEL PORTFOLIOS

The King Model Portfolios consist of index-tracking investments, providing low-cost exposure to a comprehensive range of assets and markets. The portfolios target specific levels of volatility and are matched to a client's attitude to risk. This approach aims to reduce costs and outperform the model portfolio benchmark. Clients will benefit from a competitive, transparent charging structure, on-going active portfolio management and online access to their portfolios 24 hours a day.

INVESTMENT PHILOSOPHY

The fund management industry has experienced significant change in the last quarter of a century. Product innovation has enabled investors to benefit from wider exposure to global financial markets with far greater efficiency and at a lower cost. Index-tracking investments such as Exchange Traded Funds (ETF) have grown increasingly important. We believe an actively managed, globally allocated, multi-asset portfolio, comprised of low-cost ETFs with diversified holdings in equity, bond, commodity and property markets is statistically more likely to outperform a traditional "stock picking" manager most of the time.

INVESTMENT STRATEGY

The King Model Portfolios are medium to long term investments (5 years or more) and are not suitable for money which might be needed in the short term.

INVESTMENT TEAM

The Tavistock Asset Management Investment Committee carries direct responsibility for all discretionary investments at the firm. The principal focus of the committee is to monitor the performance of each investment solution within the Centralised Investment Proposition (CIP) against its stated investment objectives, target market and long-term return objective versus its peer group.

ABOUT TAVISTOCK ASSET MANAGEMENT

Tavistock Asset Management (TAM) is authorised and regulated by the Financial Conduct Authority to provide Discretionary Fund Management (FRN: 955719). Tavistock Asset Management Limited is a wholly owned subsidiary of Tavistock Investments Plc. TAM manage over £1bn of assets on behalf of all clients, aiming to provide private clients with access to institutional quality portfolio management at a retail price. TAM's model portfolios provide individual investors with the benefit of collective buying power to ensure that the charges they incur for model portfolio management, platform fees and dealing are amongst the lowest in the industry. Currently, Tavistock has over 175 financial advisers helping 50,000+ private clients look after more than £3.5bn of investments.

PEER GROUP

Although the PROFILE is not benchmarked against the IA sector one may wish to compare the performance of King Income Portfolio to the IA Mixed Investment 20-60% Shares sector for peer group analysis.

FACTSHEET
August 2023

MANAGER COMMENTARY

August began with a surprise downrating of US debt by the rating agency Fitch, cutting their rating from the distinguished AAA to AA+. Fitch justified the cut by stating the move reflected expected fiscal deterioration and growing debt burdens. The cut led to heightened volatility across asset classes, particularly in long-dated US Treasuries as investors evaluated the downgrade. Bond markets fell with the Bloomberg Global Aggregate index underperforming the Global High Yield index, down -1.37 and -0.51% respectively. In continued stimulatory efforts, the People's Bank of China reduced stamp duty on stock trades, the downpayment requirement for homebuyers and slashed interest rates on new mortgages. The Shanghai Shenzhen CSI 300 Index, which fell 8% intra-month, rebounded following the stimulus measures to finish the month -6% lower. In developed equity markets the MSCI World declined -2.35% whilst the S&P 500 held up comparatively better, down -1.59%. Jerome Powell spoke at Jackson Hole, the annual gathering of US central bankers. He highlighted a willingness to raise rates where appropriate and maintain current restrictive levels until confident inflation is moving in the right direction. The US labour market added 187k new jobs in August, above expectations, but the July reading was revised lower and the unemployment rate rose to 3.8%. Inflation rose slightly, as evidenced by the Personal Consumption Expenditures index (PCE) which gained 0.2%. In the UK, the BOE raised its official bank rate 25bps to 5.25%, continuing its efforts to lower inflation. Inflation moderated slightly with the UK Consumer Prices Index falling from 7.9% to 6.8% in the year leading up to July 2023. GBP/USD declined -1.26% and the FTSE 100 fell -2.61% during the month. Commodity markets also declined in August. The Bloomberg Commodity Index fell -1.22% although oil bucked the trend, rising slightly on falling inventories and Saudi Arabia supply cuts.
